The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 15 -- 18 are rejected under 35 USC 102 (b) as anticipated by Inoue (325) or Inoue (738). Inoue (738) note column 4 lines 47-49, column 5 lines 7-10 column 7 Lines 37-40 and column 8 lines 2-4 teaches a single crystal of langasite which Euler angles that include the specific cuts and/or portions of ranges contained in applicants claims. Regarding Inoue (325) note column 4 lines 41-43, column 5 lines 1-3 and column 7 lines 31-33. Regarding method claims 15 and 16, the steps are known per se. They are the same steps always used to to determine (orient) a piezoelectric crystal blank prior to cutting. The step of setting a range in an optimal range is always the goal when designing a piezoelectric device. Thus, assuming that Inoue follows the known routine design and cutting criteria to obtain the substrates, Inoue anticipates this claim. Regarding claims 17 and 18, note for example table 1 (column 1, Inoue (325)) which teaches the use of quartz and lithium tantalite as surface acoustic wave substrates with specific angles, presumably each of which was selected as the optimum for its intended purpose. Thus, this described prior art, anticipates claims 17 and 18.

Claims 3-14 are allowed.
